

Group 1 Solutions, Inc. Press Release

FOR IMMEDIATE RELEASE

HEADLINE: Group 1 To Offer Mobile Dispatch Integration Using BIO-key Mobile Server Tools

BODY:

(GLEN ELLYN, IL - January 7, 2008) - Group 1 Solutions, Inc. (Group 1) has formalized an agreement with BIO-key International (BIO-key) to utilize the company's software developer tools to provide mobile dispatch functionality within the tactical response application, *REMOTE ACCESS*™. In addition, both companies are committed for Group 1 to provide enhanced mapping functionality within BIO-Key's mobile client applications in the future.

Group 1 plans to provide *REMOTE ACCESS* users with mobile dispatch functionality, including unit status changes, vehicle to vehicle messaging, local/state/federal data base searches, and many other dispatch functions through a single integrated interface. Having these functions available to *REMOTE ACCESS* users will eliminate the need to switch between two or more applications during the incident response process. BIO-key's software tools currently provide interface capabilities to many of the popular dispatch and message switch vendors, which in turn will allow Group 1 to communicate with these systems and support mobile client functionality on a wide number of dispatch/mobile configurations.

Group 1 has had a one-way interface to BIO-key's PacketCluster Mobile for several years and uses the functionality to perform automated searches within *REMOTE ACCESS*. The planned integration will provide many two-way communication capabilities within *REMOTE ACCESS*. The final design plans will be developed during the first quarter of 2008.

BIO-key International, Inc., headquartered in Wall, New Jersey, develops and delivers advanced identification solutions and information services to law enforcement departments, public safety agencies, government and private sector customers. BIO-key's mobile wireless technology provides first responders with critical, reliable, real-time data and images from local, state and national databases. BIO-key's high performance, scalable, cost-effective and easy-to-deploy biometric fingerprint identification technology accurately identifies and authenticates users of wireless and enterprise data to improve security, convenience and privacy and to reduce identity theft. Over 750 police departments in North America use BIO-key solutions, making BIO-key the leading supplier of mobile and wireless solutions for law enforcement. (<http://www.bio-key.com>)

Group 1 Solutions, Inc. is a professional services firm exclusively serving all units of government with consulting, conversion services, and advanced software solutions for civilian and military force and property protection. With over 4,000 licenses, helping protect over 17,400,000 citizens throughout the United States as well as the brave men and women in our armed forces, *REMOTE ACCESS* is the market leader in GIS-centric mobile intelligence solutions.
